**Update on MAP Testing for 2016-**

Students in grades 3-8 will take an online MAP test this spring. The 2016 test will be provided by Data Recognition Corporation (DRC). There will be interim assessments available for districts to use throughout this year prior to MAP testing in the spring. The interim assessments will provide information on skills students still need to work on. The 2017 MAP test will be aligned to the revised Missouri Learning Standards which should be available for review in March.

**Elementary Grade Level Meetings-**

Mrs. Burks, Mrs. Grammer and I met with each elementary grade level team to discuss guided reading as a follow up to the professional development they received in October and to discuss the reading and math resources being used at each grade level. We will be reviewing math resources this year to determine what to purchase for the 2016-2017 school year.
